surface families

1000 x 2000

typical max mm size

1 week

typical production

Three material routes

Choose by atmosphere, performance and project requirements

Natural Igusa

Authentic rush grass texture, fragrance and traditional Japanese atmosphere.

MIGUSA / SEKISUI

Durable synthetic surface with easy maintenance and rich color options.

Washi / DAIKEN

Japanese paper-based surface for long-lasting color, durability and floor-heating options.

Custom-made for project sites

Dimensions, thickness and special shapes can be specified

Made to fit rooms, platforms, beds, tea rooms and installation areas

Custom thickness available depending on product and specification

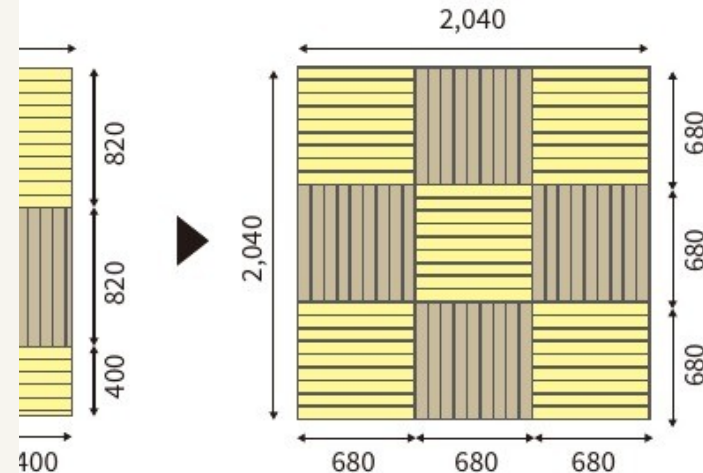

Notched corners, cut-outs and irregular shapes can be reviewed from drawings

Traditional tatami edges and thicker tatami styles are also available

Please send drawings, floor plans or measured dimensions for confirmation.

Natural Igusa

Traditional Japanese tatami surface

Authentic natural rush grass texture and fragrance

Premium Japanese igusa and standard natural igusa options

Suitable for high-end homes, hotels, tea rooms and cultural spaces

Traditional decorative edge styles available

Best for projects where atmosphere and authenticity are the priority.

された熊本産の天然い草を100%使用して
り長さで、い草の真ん中の部分の身が充実
ます。

5等タイプの黒よりい草を多く織り込んで

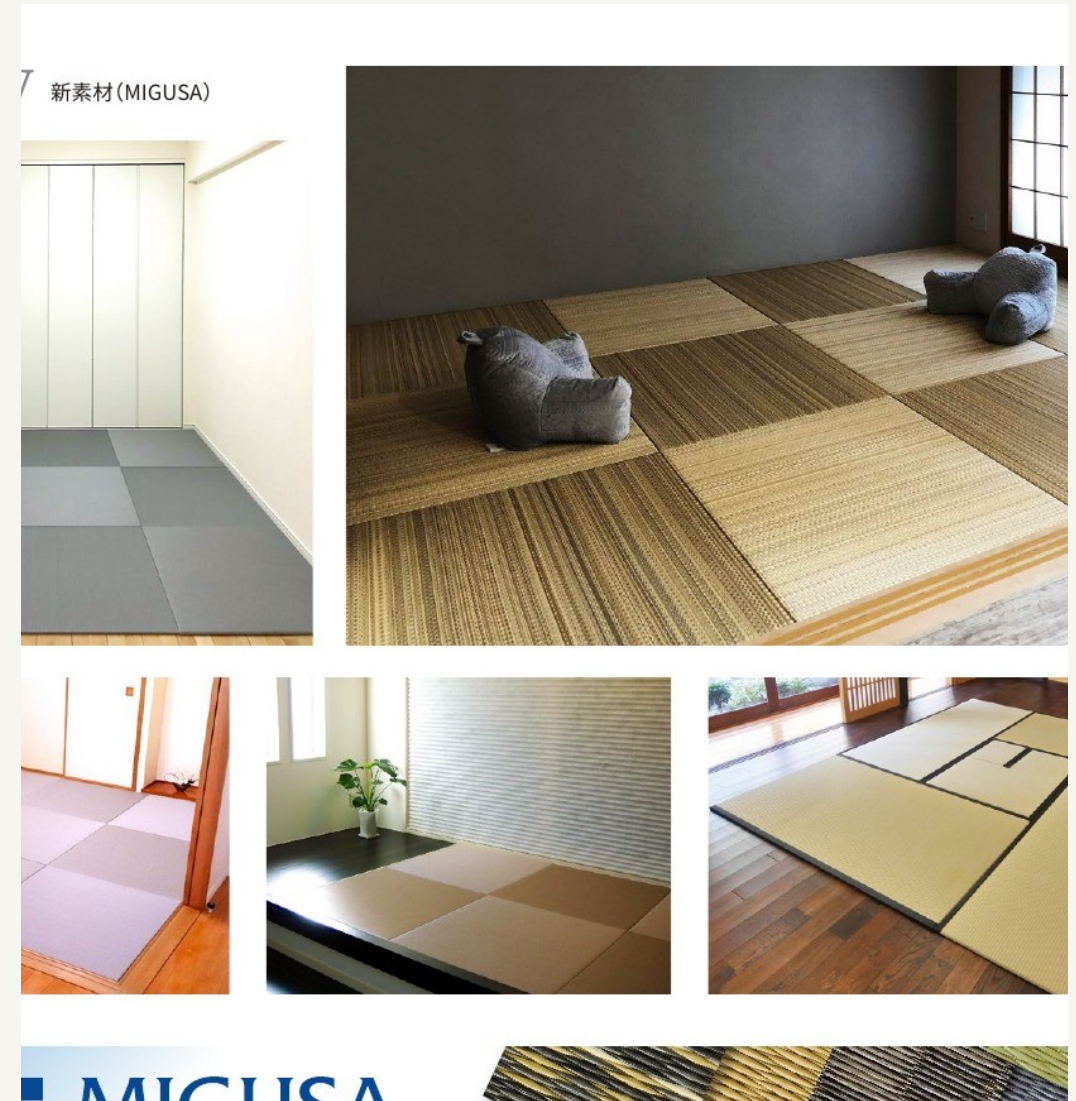

MIGUSA / SEKISUI

High-performance synthetic tatami surface

High durability and resistance to fraying
Excellent color stability for interiors with sunlight
Easy cleaning and strong water resistance
Washable tatami can be manufactured with a water-resistant core

Best for hotels, restaurants, offices and high-traffic spaces.

Washi / DAIKEN

Japanese paper-based tatami surface

Durable surface with strong resistance to wear
Color-stable and easy to maintain
Water-repellent coating helps prevent stains
Floor-heating compatible tatami can be produced with a suitable core

Best for modern interiors, residential developments and DAIKEN-specified projects.

Project order flow

A simple route from inquiry to international delivery

1 Project inquiry

Location, dimensions, material, quantity and drawings.

2 Specification

We recommend suitable tatami material and construction.

3 Quotation

Price based on size, quantity, processing and delivery destination.

4 Production

Manufactured in Japan after specification and payment confirmation.

5 Shipping

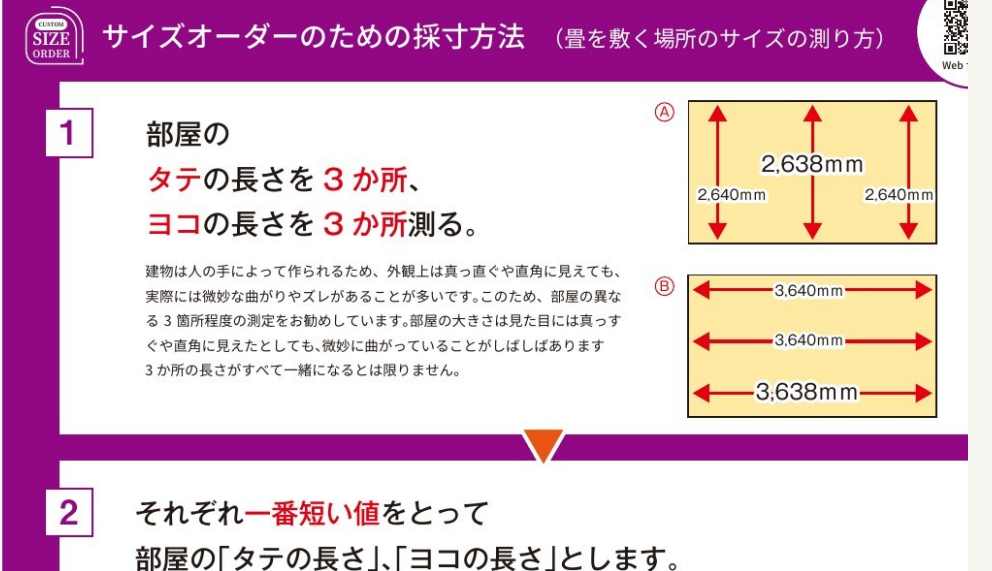

Delivered to company, project site or customer worldwide.
